Universities

NGOs

WHITAKER PEACE & DEVELOPMENT INITIATIVE

Digital Skills

Contribute to preparing a digitally skilled workforce

Promote digital learning in schools and teacher digital skills development

Equip students and youth with advanced digital skills

Help improve gender equality by empowering women and girls through ICT

Empower children and youngsters in crisis and conflict situations through ICT-led education

Education and Digital Inclusion

Digital Inclusion aims to ensure that all individuals and communities, including the most disadvantaged, have access to Information and Communication Technology (ICT) and can use it in a responsible, safe and empowering way.

Access to Internet

connect | to learn

Through Connect To Learn, Ericsson flagship education program, we are contributing to the establishment of an inclusive digital infrastructure, that aims to empower teachers, students and schools to deliver a quality 21st century education accessible to all. The program also aims to develop the digital skills of children and youth to contribute to preparing a digitally skilled workforce.

Ericsson Educate Portfolio

Learning *with* technology

Learning *about* technology

Teachers & students
Schools & Learning Centers

Ericsson Educate Platform

Provide a cloud-based ICT solution in schools and learning centers lowering initial and total cost of ownership for schools, and significantly reduces the complexity of technology solutions in schools.

Offerings:

- Learning/school management system
- PC as a Service
- Introduction training for basic digital literacy
- VR-based advanced training for the use of technology in the classroom

Children (11-16y)

Ericsson Digital Lab

Inspire children and provide them with the courage to approach technology and problem-solving, through mentorship and hands-on activities

Offerings :

- Robotics
- Game development
- Electronics
- AI

Practical hands-on exercises

Engagement of Ericsson or partner employees as trainers

Students (16-25y)

Ericsson Educate Content & Curriculum

Impart training about existing and emerging technologies in the Telecom and IT sector

Offerings :

21st Century Technologies — 15 hours of online courses on: 5G, AI and ML, automation, cloud computing, data science, IoT and telecommunications

5G University — 64 hours of slide content in PDF format with slide show and instructor notes: 5G RAN, 5G Core and 5G Cloud content

Training of trainers, webinars with Ericsson SMEs, assessments and Ericsson Educate digital badges

Girls (10-18y)

Ericsson Educate Empowering Girls

Inspire girls to be leaders and problem solvers in their lives and their community using technology.

Offerings :

Employee engagement for virtual mentorship of girls in ICT:

- Entrepreneurship
- App development
- AI

Connect to Learn – Current Deployments

- CTL Basic Deployments
- EE 21st Century Technologies
- EE 5G University
- E/// Digital Lab

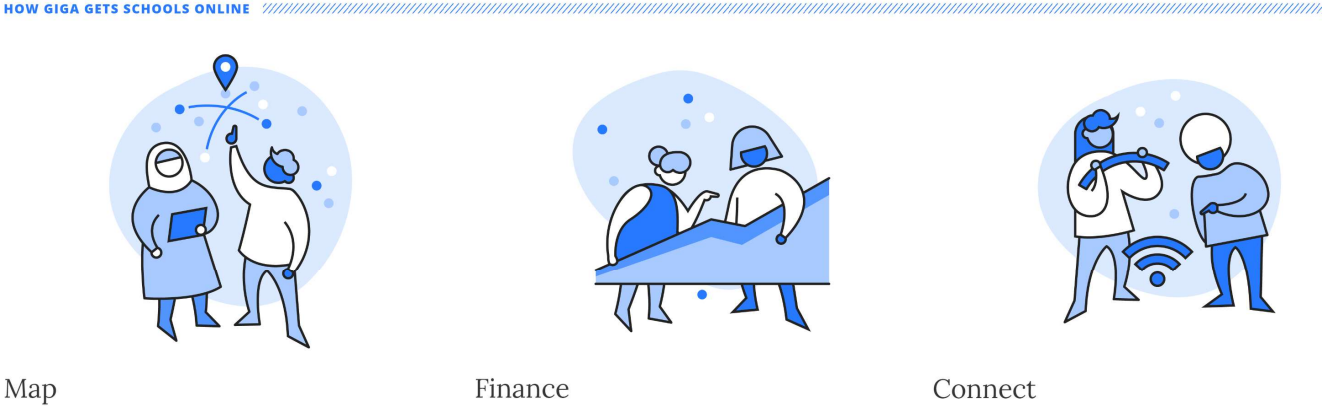

GIGA Partnership with UNICEF

ericsson.com/unicef

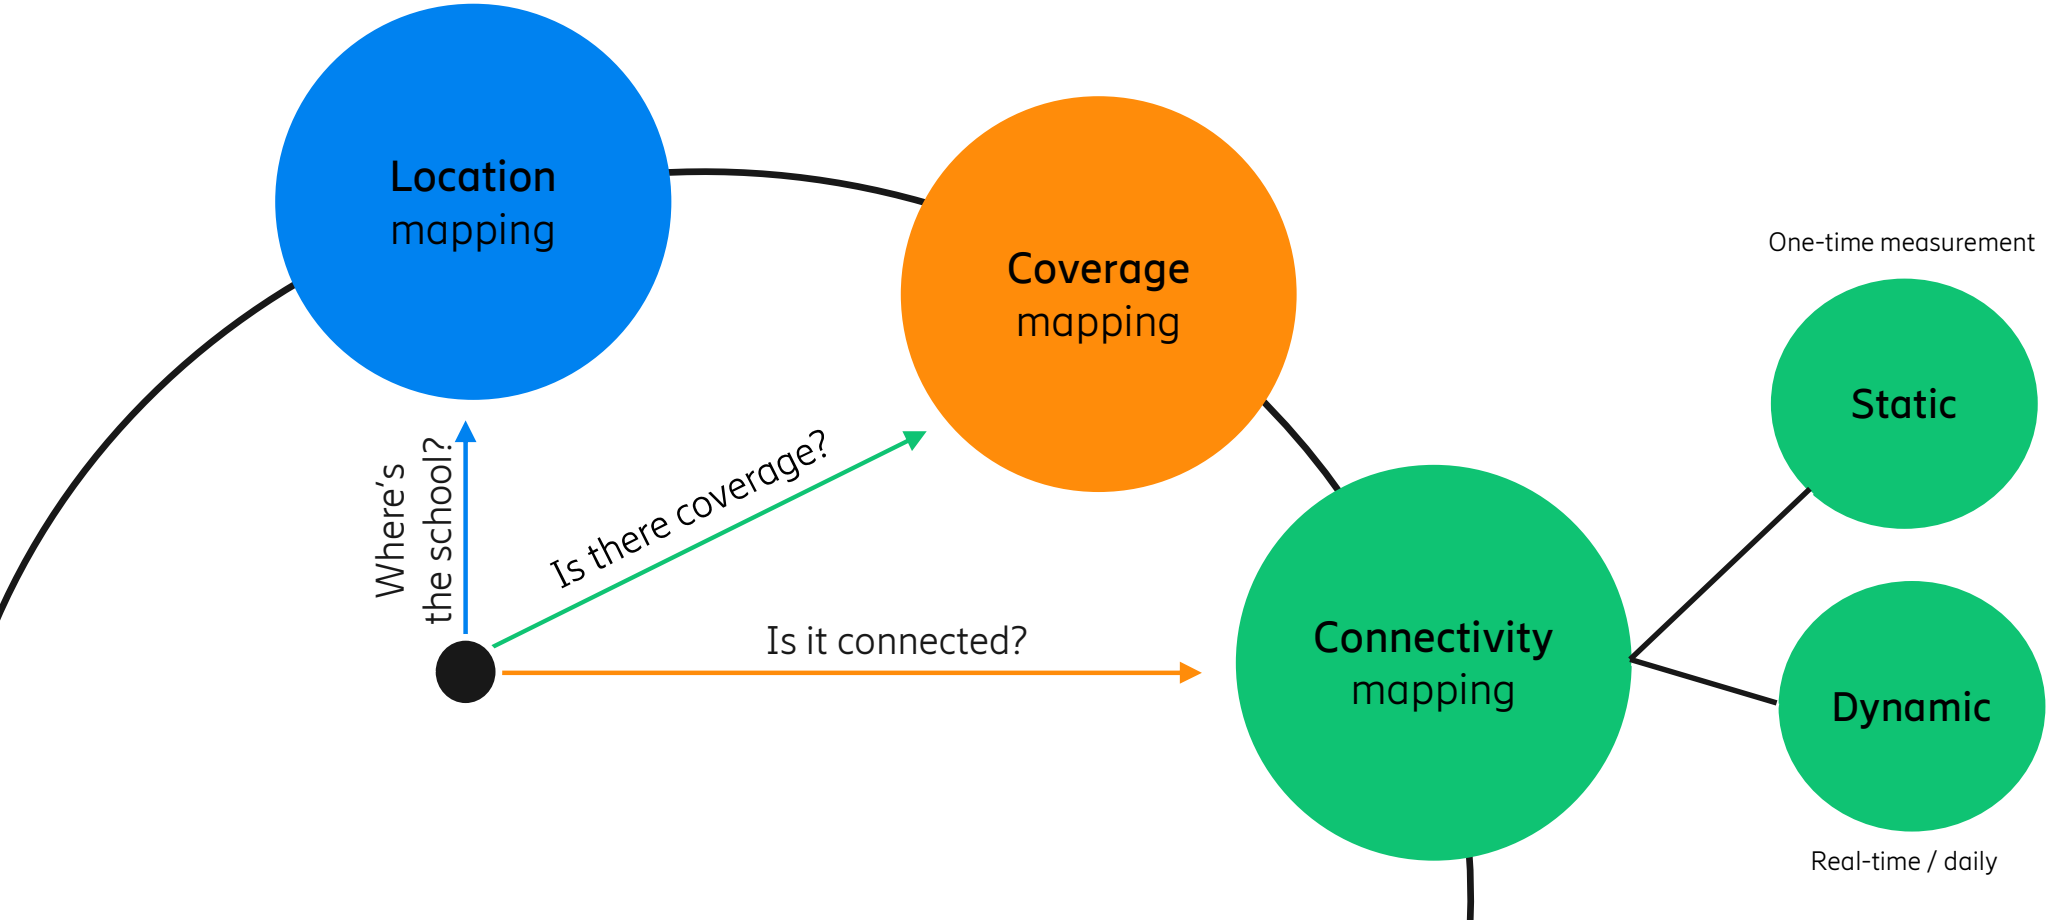

Ericsson - UNICEF Partnership for GIGA

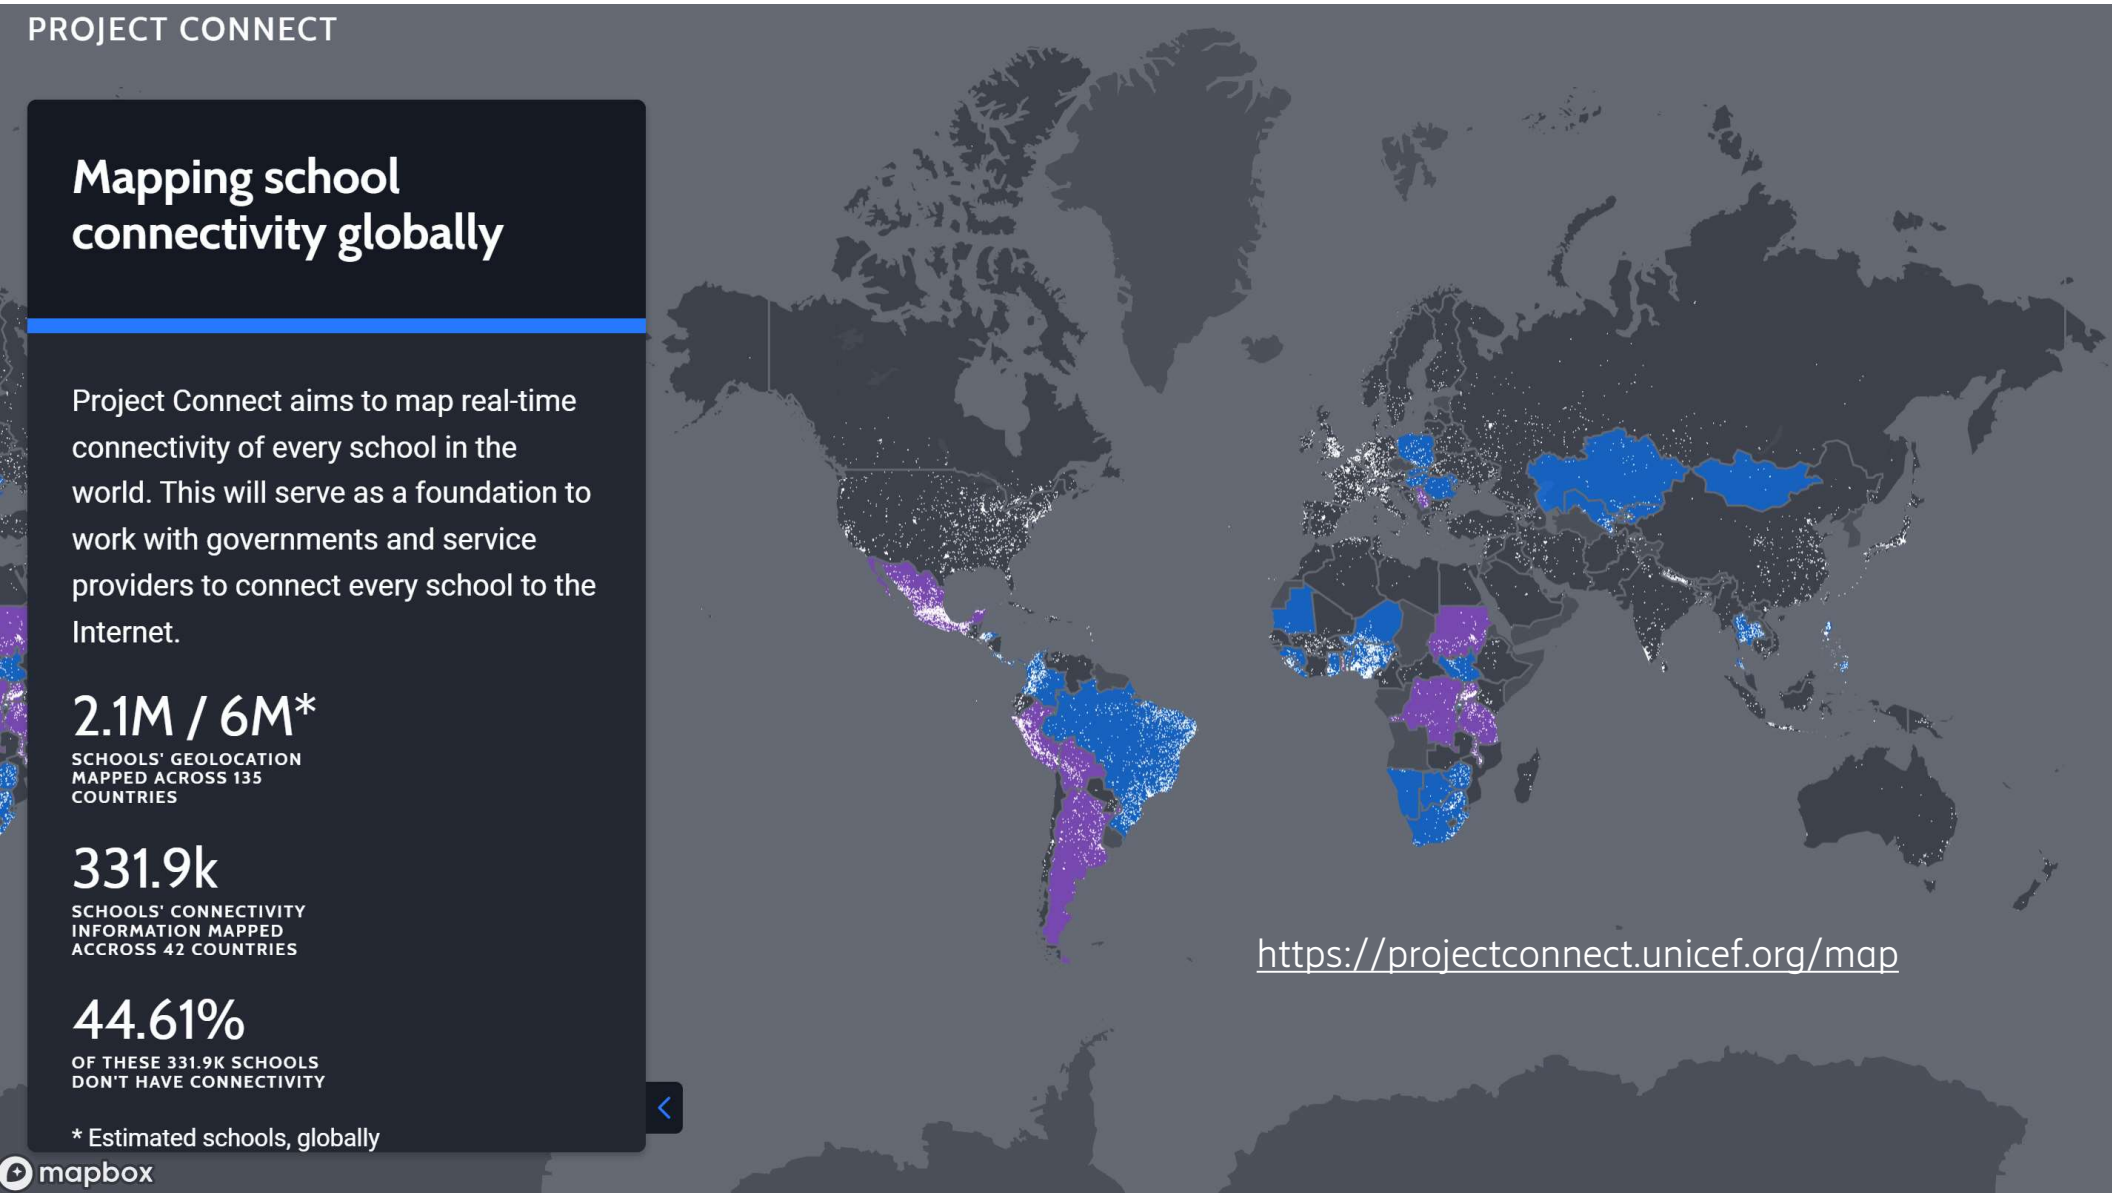

- Giga, a joint UNICEF + ITU initiative, is aiming to connect all the schools in the World to the internet by 2030.
  - Ericsson established a partnership with UNICEF in 2020 in order to help with these efforts

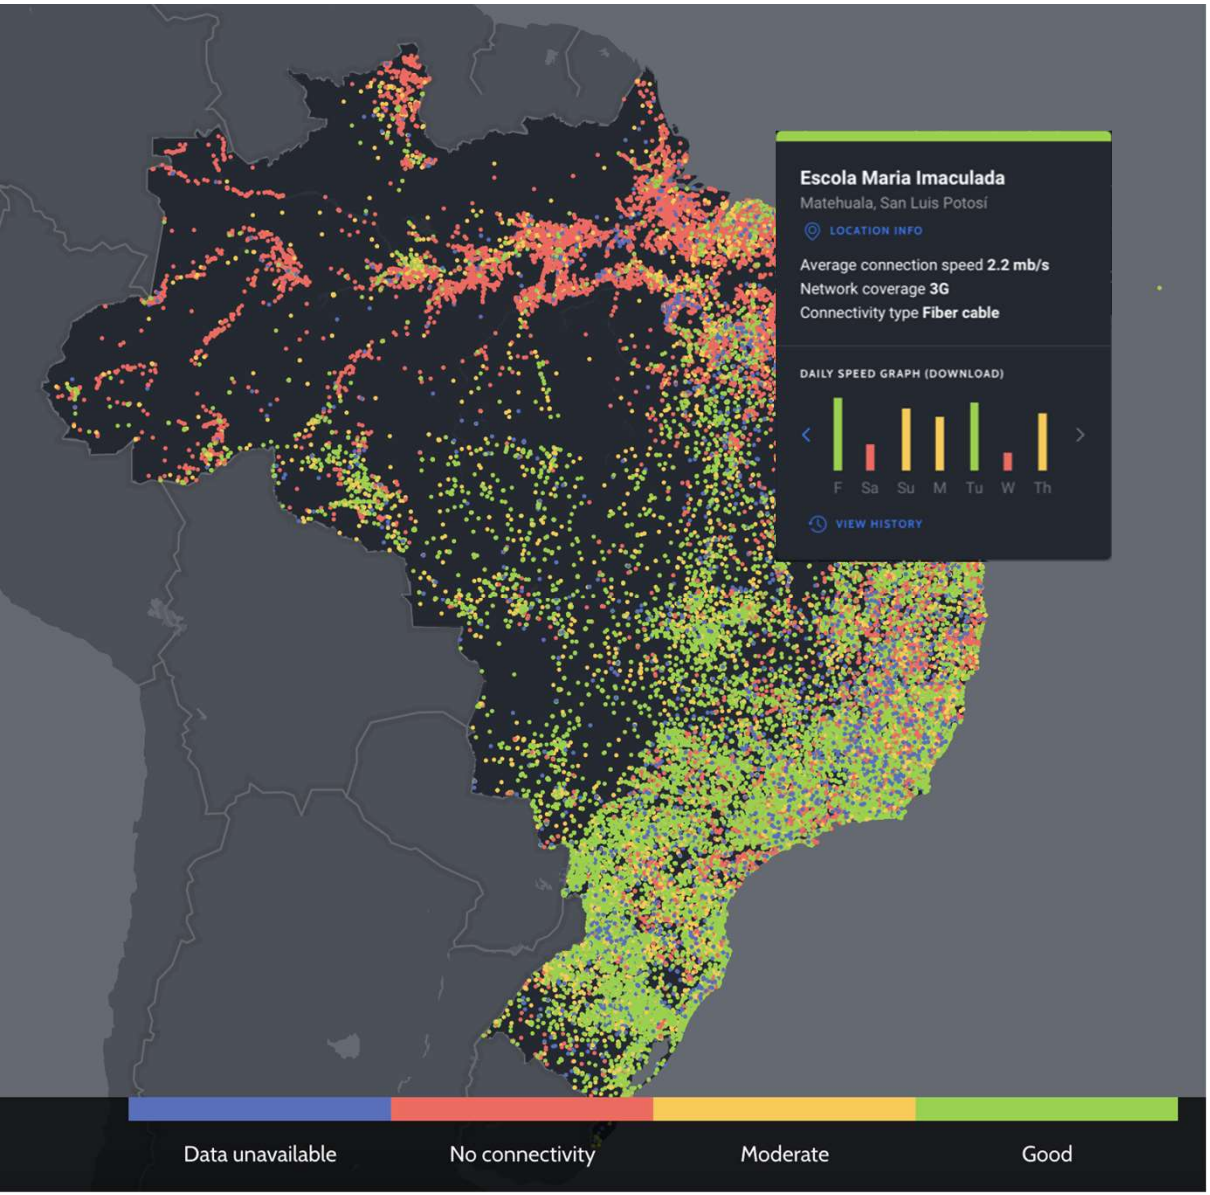

- To get schools online, Giga is putting a lot of effort in **school mapping**, to understand:
  - How many schools are there in the World (estimated ~6 million)
  - Where exactly are the schools (i.e.: **location** mapping)
  - What is their **connectivity** level
  - What is their **coverage** level (which can help to estimate the cost to connect offline schools)
  - Project Connect is building a live map
    - Up to date, 2.1M schools have been mapped (roughly 1/3 of all the schools in the World)

Three types of mapping

PROJECT CONNECT
Mapping school connectivity globally
Project Connect aims to map real-time connectivity of every school in the world. This will serve as a foundation to work with governments and service providers to connect every school to the Internet.
2.1M / 6M*
SCHOOLS' GEOLOCATION MAPPED ACROSS 135 COUNTRIES
331.9k
SCHOOLS' CONNECTIVITY INFORMATION MAPPED ACCROSS 42 COUNTRIES
44.61%
OF THESE 331.9K SCHOOLS DON'T HAVE CONNECTIVITY
* Estimated schools, globally
https://projectconnect.unicef.org/map
mapbox

Each dot represents a school, and it's colored based on its level of connectivity. The map is refreshed every few hours.

www.projectconnect.unicef.org

giga

Access to Internet connectivity for schools

FWA – What is it?

Fixed

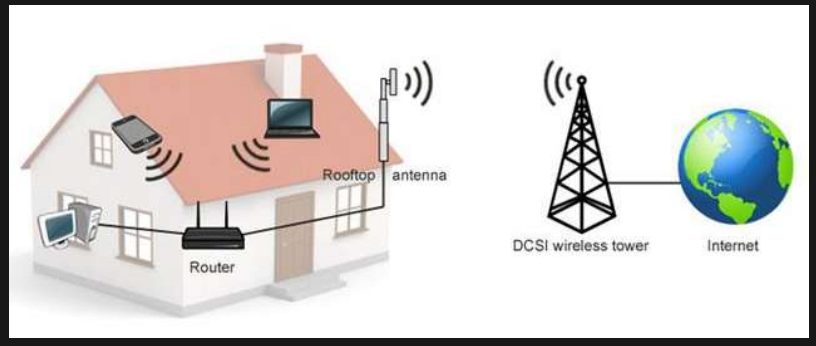

FWA is fixed as the solution is between two fixed points: e.g.: a radio cell site and a customer premises (e.g.: home, school or business)

Wireless

FWA is based on wireless technologies (e.g.: 3GPP mobile technologies such as 4G LTE and 5G)

Access

FWA is an access technology, in this case providing access to the Internet and related services (e.g.: through a broadband Subscription)

FWA – Key characteristics

CPEs

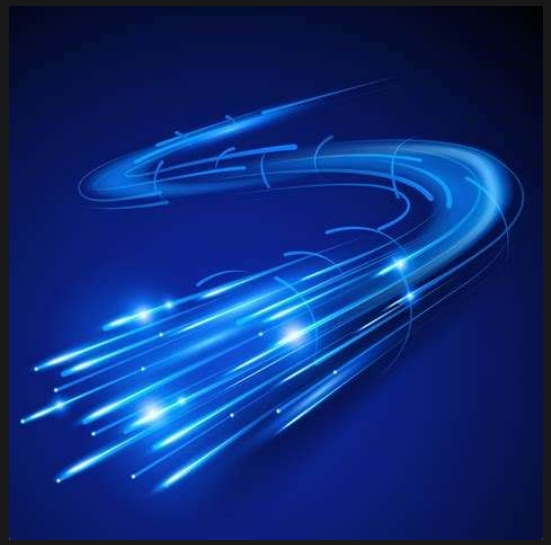

Fixed-Inspired Subscription

Guaranteed QoS

Advocacy Efforts

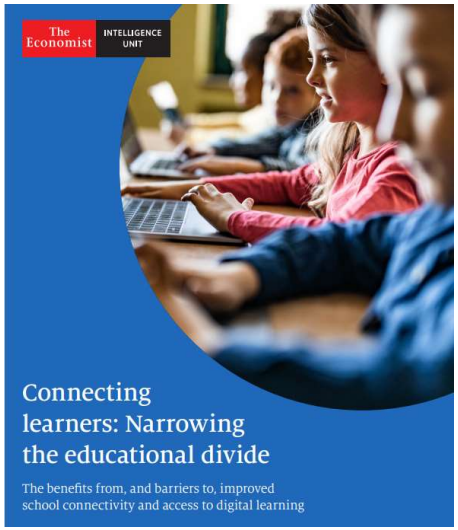

Global influencial reports

Economist Intelligence Unit

Ericsson

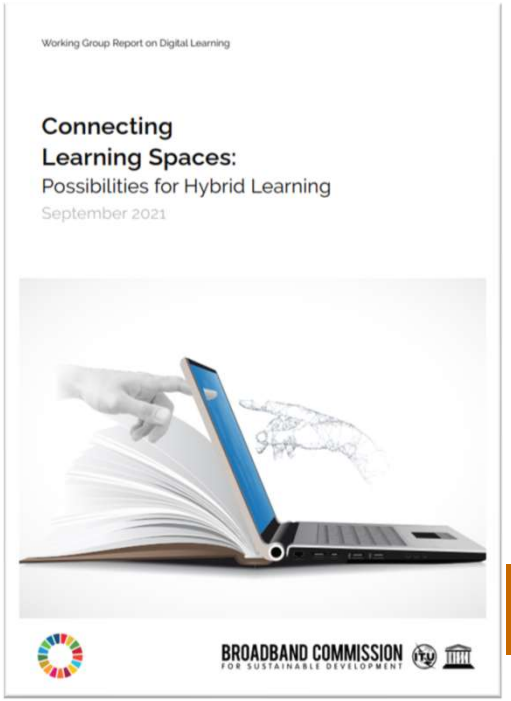

UNICEF

Launched on 15 June 2021

Highlight the social and economic dimensions of school connectivity, demonstrating the opportunities and challenges.

connect | to learn

UNESCO

ITU

Ericsson

Huawei

Broadband Commission

Launched on 19 September 2021

Advise on challenges and opportunities related to digital learning including requirements for smart investments in infrastructure, delivery, skills development and future development in relation with emerging and frontier technologies.

The Economist program overview

Objectives

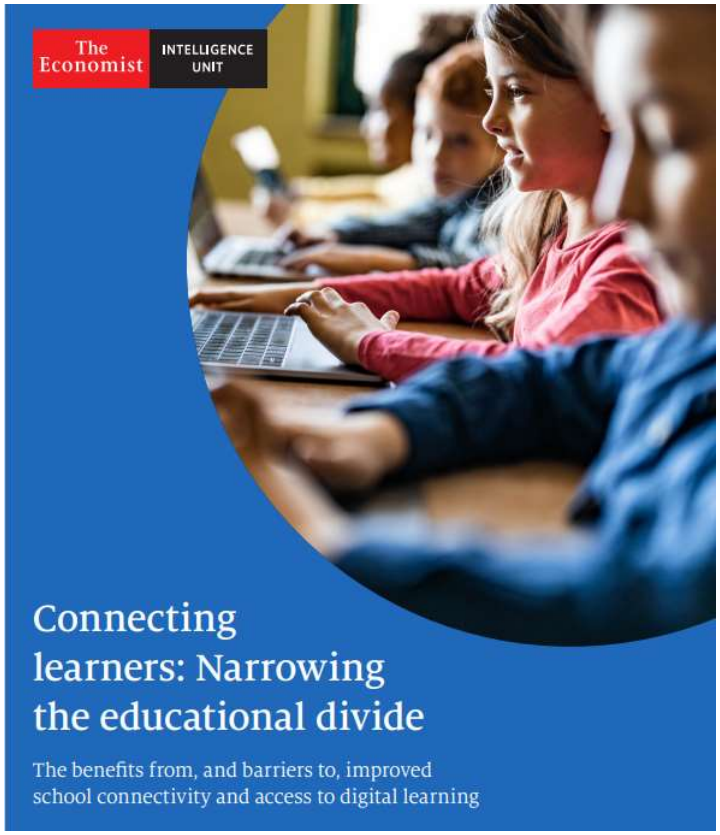

To create a content platform that raises awareness of Ericsson's partnership with UNICEF/Giga to map school connectivity.

The integrated program –connectED- will highlight the social and economic dimensions of school connectivity, demonstrating the opportunities and challenges.

We will achieve this via The Economist Intelligence Unit **bespoke research:**

- Analysis into key markets on the economic gains from improved connectivity
- Barriers to improved connectivity and how these could be overcome

Key markets	• Brazil • Kyrgyzstan • El Salvador • Niger • Sierra Leone • United States
Reference markets	• Finland • South Korea • Rwanda

Digital Learning Report

With the UN Broadband Commission for Sustainable Development

Title (under review): *Connected Education: Digital Technologies for Hybrid Learning (under consideration)*

Section	Topic	Description
Chapter 1	Delivering Hybrid Learning	How hybrid learning is emerging as a model of delivery/pedagogy which will entail a different role of teachers, new capacities to be developed in terms
Chapter 2	Three Enabling Strategies for Hybrid and Digital Learning	What are the enabling strategies to make that model work: I. Digital Skills Strategy for life, work and lifelong learning II. Connectivity and Infrastructure Strategy III. Sustainable Funding for digital and hybrid learning
Chapter 3	Framing the future developments	Discuss how this will go in the future and how frontier technologies will impact the modalities of delivery (5G, AI, Blockchain and distributed ledger tech, Cloud-to-edge)
Recommendations	1- Promote hybrid and digital learning to recover from the pandemic, reimagine education, and narrow the digital divide	
	2- Adopt a national strategy for digital skills development for life, work and lifelong learning	
	3- Promote whole -of-government and public-private partnership approaches for connectivity and infrastructure	
	4- Establish stable and sustained financing of connectivity, for hybrid learning	
	5- Proactively anticipate the impact of emerging technologies	

Digital Education Coalition

A multi-sector Coalition to protect the right to education during unprecedented disruption from response to recovery **#LearningNeverStops**

Members of the Coalition represent a wide range of expertise and competencies

Discover who they are and their commitments

Currently involved in 233 projects across 112 countries impacting 400 million learners and 12 million teachers

How the Coalition is making an impact

New actors are essential to respond to the multifaceted challenges of the education sector

Understand how the Coalition works

200 Coalition Members

"Ericsson is pledging to empower 1 Million children and young people by 2025 with access to digital tools, learning content and skills development programs."

9 December 2021

This commitment will be met through Connect To Learn, Ericsson's flagship education program, which provides teachers, students and schools access to a quality 21st century education
